

Bert M. Balk

Bert Balk is affiliated with Statistics Netherlands (CBS, Centraal Bureau voor de Statistiek). He has been responsible for the development of price statistics, has managed for years a center providing longitudinal microdata on Dutch firms (CEREM, Centrum voor Research van Economische Microdata) for external researchers, and is currently senior adviser on price and productivity statistics. Since 2001 he also holds a special chair established by CBS at the Rotterdam School of Management of Erasmus University Rotterdam.

His research focuses on the measurement of price, quantity, and productivity changes and, more in general, economic-statistical problems. He is an authority in the field of index theory, has published numerous articles on this topic, and his 1998 book *Industrial Price, Quantity, and Productivity Indices* (Kluwer) is widely cited. He is also an associate editor of the *Journal of Productivity Analysis* and *Statistica Neerlandica*.
